

You are a creative, committed person and want to gain job experience alongside your studies?
You want to learn about the interplay between research results and business applications?

Apply now!

The **Fraunhofer Institute for Applied Information Technology FIT** in Sankt Augustin has a vacancy for a

Student Assistant (M/F/D) – Frontend Developer in the field of Internet of Things

As a member of the Human-Centered Engineering and Design department you will support us in frontend development. The position is available immediately.

Your tasks include:

- Development of Web applications/frontends for the Internet of Things using JavaScript and ReactJS
- Working together with designers and/or social scientists to derive user interfaces from user requirements
- Test your interfaces with users and improve your own prototypes
- Co-authorship in scientific publications

We would be pleased to see results of your research work at FIT also appear in your master's or bachelor's thesis, and we are happy to support that.

What you bring to the job:

- You are a registered student in Computer Science / Software Engineering / Media Informatics or a related field of study
- You have practical experience in developing Web services and APIs (e.g. RESTful APIs) and with version control tools such as Git
- Experience with User-Centered Design Methods is a plus
- You are familiar with HTML, CSS, and JavaScript as well as with Frameworks such as ReactJS
- You have a good command in English. German skills are desirable.
- You can work independently and want to contribute to our research work

What we offer:

- A working atmosphere characterized by innovation and collegiality
- Exciting projects that help you prepare for challenging future jobs
- Flexible working hours tailored to your schedule (maximum of 19 hours/week)

Severely handicapped persons will be given preference in the case of equal aptitude. Fraunhofer-Gesellschaft attaches great importance to gender-neutral professional equality.
